MESSAGE

Founded over 25 years ago, Bayview Services Inc., prides itself on providing turnkey services to our Trade Partners in Environmental Remediation, Specialty Demolition, and most recently Industrial Services. While Bayview is new to Southern California, we have built a lasting partnership with BNBuilders Inc. over the last several years in Northern California and seek to expand that partnership with your team in the Southern California area.
Please consider Bayview when bidding your next Southern California Project. If any pre-qualification information is needed to add us to your bidder's list, please contact me directly.

PROJECT SUMMARY

The Arbol Assisted Living and Skilled Nursing Facility in Santa Rosa underwent a multi-phased, tenant improvement project to upgrade the resident's rooms, employee offices, and common areas. The facility was fully occupied throughout the project duration, so we had to carefully perform our demolition to prevent any disturbances to the elderly residents. Our scope of work on the first floor included the removal of flooring, walls, ceilings, and a large fireplace in the reception area, employee offices, common areas. The third floor scope was to fully gut select resident rooms and demolish demising walls to allow more space per room for the build back. In order to minimize the disruptions to the residents and due to restrictions on elevator usage, we utilized exterior window that had been removed to safely loadout the debris from the 3rd floor into a dumping bin attached to a gradall.

PROJECT SUMMARY

- This project consisted of the removal at multiple locations of carpet and ceramic flooring. Even though this project was small, it was special because this was an active space and Bayview needed to work around the client's employees. Bayview took great pride on cleanliness and noise control considering it was an active work site.

PROJECT SUMMARY

Bayview Environmental Services is currently performing asbestos remediation for the decommissioning of the 640-megawatt electric power generating station composed of four conventional natural gas–fired electric steam generating units. (Units 1 through 4) Unit 5 is a peaking natural gas–fired simple-cycle combustion turbine generation unit. Units 1, 2, and 5 were retired in 2003 and Units 3 and 4 in 2016. The project also includes an administration/office building, maintenance shop/storage buildings, chemical building, fire hose shacks and main control rooms located within Units 3 and 4. Our scope of work covers removing thousands of feet of TSI piping, boiler insulation and fire bricks throughout the Units as well as removing an abundance of transite siding and piping located all over the site. This specific project requires a large work force and access to some of the areas is extremely limited. Our highly trained personnel will be working off scaffolding that spans nearly 135 feet high with confined space along with all the surrounding elements that presents a challenge that few companies in our industry can execute. Our Southern California branch is pleased to be selected as the contractor for this project as it encompasses many technical challenges involved with our trade.

PROJECT SUMMARY

This project took place on an active campus within two historic buildings at the University of San Diego. Bayview performed the abatement of all asbestos and lead containing materials, as well as the interior and exterior soft and hard demolition. There were many challenges that the project team had to navigate, in addition the sequencing, fast paced schedule, and continuous concurrent work areas/containments, this project began in the early stages of the pandemic, nonetheless it was another successful project.

Marvin J. Henderson

President

42 YEARS OF EXPERIENCE

BIO

As one of the founding members of Bayview, Marvin has over 40 years of experience in the demolition and abatement industry. He started his construction experience as a union carpenter installing specialty asbestos products. Prior to the formation of Bayview, Marvin was one of the Chief Estimators and Vice President of a publicly traded environmental company.

Marvin's initial position in Bayview was to form and develop the sales and estimating team. Now as President of Bayview, he continues to guide the company to be one of the leading demolition, insulation, and hazardous material abatement contractors in California.

CERTIFICATIONS/TRAINING

- Qualifying individual for the California State Contractors license for Bayview Demolition Services, Inc. License #764068

> **Safety = success. The cleaner and safer the job site, meaning our people are on task and organized, the fewer injuries we experience. It's that simple. And the project comes out more successfully: on time, on budget. This all makes the clients happier.**

Thank you guys for getting a crew ready to go on such short notice. Demo went smoothly!! Also, I can't speak enough about Miguel the foreman, he thought of everything from setting up plastic around the mock-ups to bringing a mop to wipe the floor down when done. The crew was incredible and super hard-working, these guys meant business.
